

Lead Lined Sharps Containers

Lead Lined Sharps Container

Inderlec's lead lined sharps containers are manufactured using powder coated steel lined with 5 mm lead. These containers have flip top lids to eliminate the problems associated with having a removable lid.

Easy grip handles on the top of these units mean that removal of the lid is simple and relatively effortless.

These lead lined sharps containers are designed for the IDC 4 Litre disposable sharps containers.

4 Litre Lead Lined Sharps Container

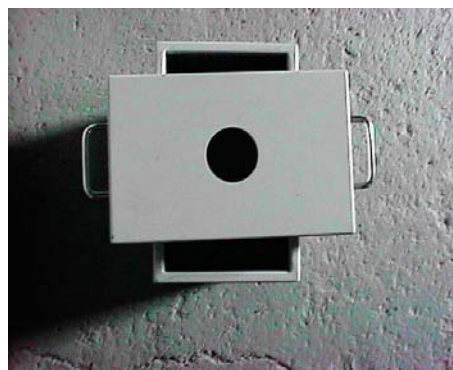

Table Top or Wall Mounted Sharps Container

Made from durable powder coated steel, these 2 litre sharps containers are designed for when space is a premium. Either as a bench top or wall mounted unit, these sharps containers feature 5mm Lead lining and house the 2 Litre IDC Sharps container.

The units do not come standard with flip tops but can be supplied with one if required.

7.8 Litre BD Guardian® Lead Lined Sharps Container

Specifically designed to suit the 7.8 Litre "bottle" style BD Guardian sharps containers.

2 Litre Lead Lined Sharps Container
