

Holter ECG System

NORAV NH300 Holter System

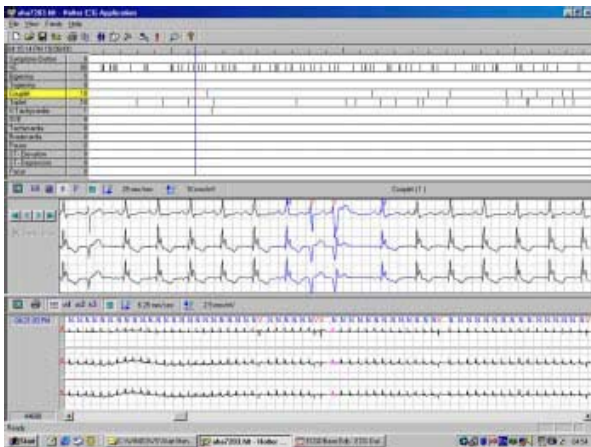

Holter monitoring has never been easier.

Norav's Holter system has an outstanding on-screen graphics, remarkable speed for downloading the patient data from the recorder to the PC by using a USB cable or flash card reader.

Within minutes after downloading, the analysis is completed and ready to be printed. The small patient recorder offers the patient maximum comfort.

The Norav Holter system is very cost effective, and the software gives you a comprehensive Holter report you can depend on.
