

Trackmaster FVX-325 Mini

Trackmaster FVX-325 Mini

Trackmaster Treadmills have introduced the world's first mini treadmill. Ideal for those customers that have space as a premium.

The FVX-325 has a smaller foot print whilst maintaining the exceptional build quality and reliability of Trackmaster.

Available in models with and without controller, the FVX is fully interfacable with almost all ECG systems and actually has a higher load rating than the conventional 425. It can cope with patients up to 227kg.

Specifications

User Capacity - 227kg
