

Hotlab Construction

No other company has constructed more Hotlabs in Australia than Inderlec Medical Systems.

When it comes to building hotlabs and room shielding many practices have come to realize that the craftsmanship, usability and quality of work is absolutely paramount.

This is especially important considering that generally labs are replaced only every 10—15 years.

Therefore a cheap price is long forgotten and the shoddy workmanship lingers for a long time.

Inderlec has had more than 10 years experience with lab construction. Our record, workmanship and customer satisfaction speaks for itself.

Don't trust any other company with your lab construction, or you may spend the next 10 years regretting it.

Whether it is a simple Hot lab, a new PET lab or a complete department construction, Inderlec Medical Systems has the track record to prove that we are the best choice for your next project.
