

Lead Lining

Inderlec Medical Systems provides a complete shielding service for all radiation shielding applications.

We have had more than 10 years shielding experience and have shielded some weird and wonderful applications.

From iodine sewerage tanks, research X-Ray irradiators, PET labs, Hotlabs, CT rooms, General rooms, Cath Labs. We have had experience in almost all applications.

We offer complete shielding calculation services by experts based in every state. We have experts that are 100% up to date with every states requirements because they work and live in those states.

Our services can match your exact needs. We can prefabricate lead sheeting for installation by your builders or we can install it for you.

We also do a full range of prefabricated operator shielding for Mammo Rooms, General Rooms, OPG rooms or any other applications that requires a shielded X-Ray screen.

From single rooms through to entire departments, Inderlec Medical Systems has the experience and the quality you can rely on.

Call us for indicative pricing on your next project.
